

Dear Colleagues,

We would like to invite you to the EANS2022 – European Congress of Neurosurgery – and to Belgrade!

The Congress theme – **Trends, Insights, Innovations: Neurosurgery beyond Technology** – addresses the complex relation between technological advances and human ingenuity in the field of neurosurgery. The age of rapid technological progress, artificial intelligence, machine learning and virtual reality in the 21st century has brought many benefits to neurosurgery, but also many challenges.

After two turbulent pandemic years, the Congress in Belgrade will represent the regathering of European and world experts in neurosurgery. It will provide an excellent opportunity for sharing experiences and exchanging ideas through the top-level scientific program, aimed at providing a comprehensive insight into these benefits and challenges and striking the right balance between technology and human (neurosurgeons' touch).

The opportunity to hold this event of utmost scientific and social importance in Belgrade is a special honour for the neurosurgical community in Serbia and a much-appreciated acknowledgment of the enhanced regional and international cooperation in the previous period.

The Congress host city, Belgrade, has been the venue of several noteworthy international neurosurgical events over the past years – that said, we are particularly delighted to be able to host the EANS2022 Congress, which encapsulates the reintegration of the region into the mainstream of European neurosurgery.

Offering a unique blend between West and East, North and South, past and future, Belgrade will surely greet you with an open heart and an open mind.

We very much look forward to seeing you all in person next October in Belgrade!

Lukas Rasulić
EANS2022
Congress President

Andreas Demetriades
EANS President

Welcome.
Explore.
Enjoy.

EANS2022 Scientific Committee

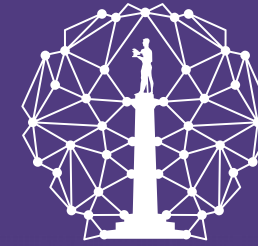

<u>Congress President</u>	<u>EANS President</u>	<u>EANS Board Scientific Chair</u>
Lukas Rasulić	Andreas Demetriades	Claudius Thomé
<u>Scientific Committee</u>	<u>EANS Section Chairs</u>	<u>Local Chairs</u>
Functional Section	Olaf Schijns	Goran Pavlicevic
Neuro-Oncology (Tumour)	Matthias Simon	Petar Vulekovic
Neurotrauma & Critical Care	Bart Depreitere	Djula Djilvesi
Pediatric Neurosurgery	Sergey Gorelyshev	Vojin Kovacevic
Peripheral Nerve Surgery	Christian Heinen	Lukas Rasulić
Radiosurgery	Piero Picozzi	Vojislav Bogosavljevic
Skull Base Neurosurgery	Michaël Bruneau	Miodrag Rakic
Spinal Neurosurgery	Florian Ringel	Danilo Radulovic
Vascular Neurosurgery	Andreas Raabe	Goran Tasic
Cerebrospinal/Hydrocephalus	Mansoor Foughi	Nebojsa Stojanovic

EANS2022 Belgrade

October 16 – 20

TRENDS. INSIGHTS. INNOVATIONS.
Neurosurgery beyond technology.

THE EUROPEAN ASSOCIATION
OF NEUROSURGICAL SOCIETIES

eanscongress.org
#EANS2022

Congress Theme

The Congress will cover the whole neurosurgical spectrum. Dedicated sub-specialist sessions will address different neurosurgical fields in the context of its overall theme:

*"Neurosurgery beyond technology:
Trends. Insights. Innovations."*

About the EANS

The European Association of Neurosurgical Societies (EANS) is both an independent federation of European national neurosurgical societies and a fast-developing association of individual neurosurgeons from around the world.

We are a professional community whose aim is to enhance the quality of neurosurgical patient care through training, education, and research. A keyway in which we fulfil this objective is by facilitating the exchange of scientific information at the highest level through the organisation of meetings, symposia, and educational courses – with the annual Congress as our flagship event.

The Brain & Spine (BAS), the new peer reviewed open access journal owned and operated in partnership with EUROSPINE was officially launched last year. The new journal published by Elsevier allows more freedom and influence in publication policy and management. The two Co-Editors-in-Chief, Wilco Peul (EANS) and Frank Kandziora (EUROSPINE) together with a diverse and multidisciplinary editorial board adhere to the highest standards of science and ethics and thus provide high-quality reviews for the submitted articles.

To find out more about the EANS, our activities and membership please go to www.eans.org

The Venue

Crowne Plaza Belgrade

10 Vladimira Popovica, 11070 Belgrade

The stylish Crowne Plaza Belgrade hotel is located in the heart of the New Belgrade business district and offers everything needed to host great meetings. It is well connected to the city centre and its main attractions, as well as to the Belgrade Nikola Tesla airport.

The City of Belgrade

Due to Belgrade's boisterous nightlife, *Lonely Planet* named Belgrade "One of Europe's 10 hot spots" while *The Sunday Times* declared it "The new capital of cool".

Belgrade, a metropolis of rivers with more than 100 boat restaurants and floating discotheques moored along 220 km of riverbanks, makes the city a unique capital in Europe. This "White city" is the only capital built at the confluence of two big rivers – the Danube and the Sava. The fusion of cultures is best expressed in the Serbian traditional cuisine, music and folklore.

ACCESSIBILITY

Belgrade's "Nikola Tesla International Airport" (BEG) is the main gateway to Serbia. Belgrade has direct flight connections to/from approx. 80 major European, Middle Eastern and US destinations. From Belgrade Airport it takes approximately 20 minutes to the Savar Centar. A taxi ride from the airport to the city center should cost approximately € 12 (1400 RSD).

Belgrade also has regular and direct rail connections with capital cities in Central and Eastern Europe.

Within Europe, transport by bus could also be an option. Belgrade has excellent bus connections with more than 17 European countries, including Flixbus routes.

Public Transport

Belgrade has a good public transport system, which includes busses and trams.
